

ITL Essentials™ Sharps Passing Tray

Sharps Passing Tray

Multiple access point design enables careful sharps component placement and removal

Holds variable sharps component sizes up to a 30 mL syringe — A channel at each end secures syringe in place facilitating safer transfer

Low profile design optimizes storage and reduces biohazard waste

Accommodates
commonly used sharps

Enables safer needle
and sharps transfer

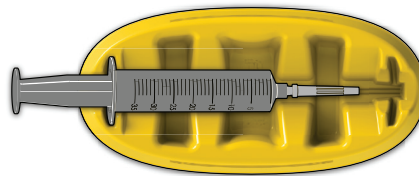

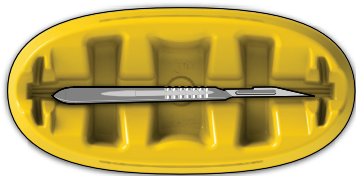

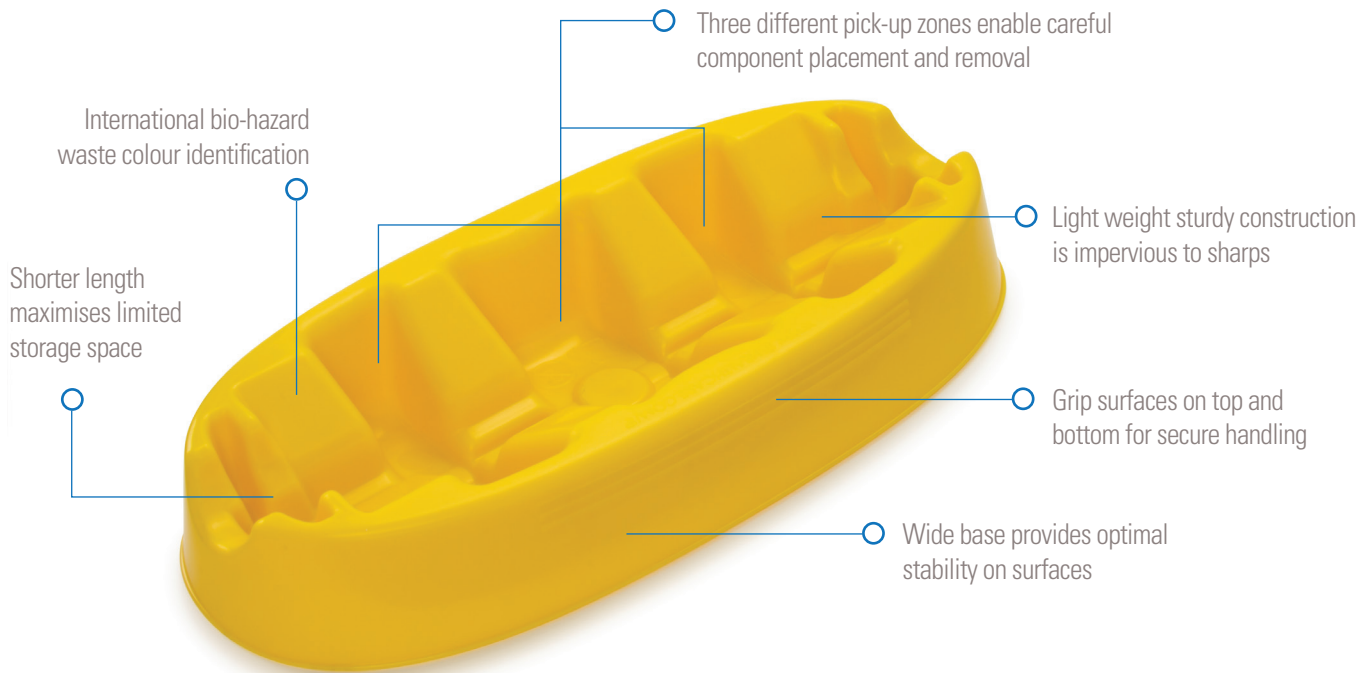

Reduces potential risk
of injury to hospital staff

ITL Essentials™ Sharps Passing Tray

Prioritizing Safety, Efficiency and Productivity

Sharps Passing Tray reduces potential risk of injury to hospital staff by safely holding sharps.

Multipurpose channel holds commonly used sharps

An innovative channel at each end secures up to a 30mL syringe flange in place for safer transfer
