

# Recover

BY THIMBLE

A SIMPLE PATCH TO ALLEVIATE SORENESS, BRUISING, AND SWELLING FROM NEEDLE PROCEDURES.

**NOW DISTRIBUTED BY ITL BIOMEDICAL!**

## Recover Breaks Down Barriers to Blood Donations

Fear of needles is often cited as one of the top reasons for not donating blood. The Recover patch by Thimble™ offers a solution. This skin-soothing adhesive patch, designed for application after needle procedures, offers an alternative to traditional bandages. It focuses on reducing tenderness and bruising and controlling inflammation, thereby enhancing the post-donation experience. By integrating Recover into your protocols, you could reduce the hesitation linked to needle procedures, provide a more reassuring experience, and increase donor frequency. Position your facility as a leader in modern donor care with Recover by Thimble™.

### Reduce Tenderness

Relieves aches and soreness, reduces tenderness and bruising

### Gentle Comfort

Eases irritation and discomfort, formulated to be gentle on the skin

### Inflammation Control

Calms inflammation and swelling for faster recovery

### Safe and Accessible

Safe for donors of all ages and available without a prescription

### Plant-Powered Formula

Free of the potential side effects of oral pain medications

### Quality Assurance

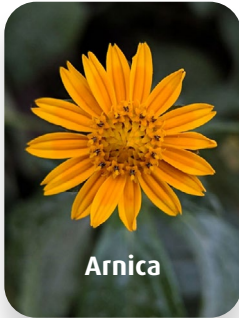

Made in the US with high standards of production

## How to Use Recover

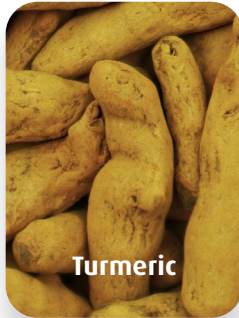

Recover is designed for ease-of-use for patients and facilities alike! Simply use it in place of a bandage after needle procedures: peel off, stick on, and feel better. Recommended to wear for eight to 48 hours. After removal, any residue will fade naturally. The Recover patch is perfect for donors of all ages.

# What's In It?

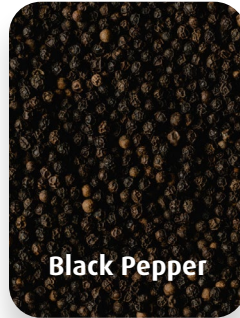

Recover uses minimal ingredients for optimal relief.

Arnica

Turmeric

Black Pepper

Coenzyme Q10

Acrylic Adhesive  
(Dermatologist Approved)

## What Users Are Saying

**93%**  
would use it again

**100%**  
would recommend  
it to a friend

**86%**  
prefer Recover to  
a regular bandage

“

“[Recover] helped ease my pre-vaccine anxiety. It was a much better experience than we've ever had in the past.”

“

“As a clinician, I hear firsthand how fears of injections or blood draws prevent many people from getting necessary medical intervention... the Recover patch is a promise of relief post-injection—a reminder that there is something to comfort you at the end.”
